Seals

Seals live all over the Earth. You **can find them in the Atlantic Ocean and the Pacific Ocean.** Seals **can spend a lot of time in the sea** searching for food. They **can hunt** fish, octopuses, crabs, and krill, but they **can't hunt birds.** There are 33 different kinds of seals. The smallest seal is the Galapagos Fur Seal, which weighs only about 63 kilograms. The biggest is the Southern Elephant Seal, which **can weigh up to 4,000 kilograms!**
